

# Arsal Mehran

Software Engineer

(253)-508-6765 | [arsalmehran@gmail.com](mailto:arsalmehran@gmail.com)

Self-taught developer strong in JavaScript and open to exploring any technology that excites me, though with strengths primarily in the MERN stack (MongoDB, Express.js, React, Node.js). Passionate about creating projects with responsive, cutting edge designs and an emphasis on optimizing performance. Spends free time exploring game development as a hobby.

## PROJECTS

### Face-Recognition app — *React.js/Express*

- Submit pictures for detection with Clarifai's Face-Detection API
- User submissions are tracked and scored with each submission

### Clothing Store — *React/Redux/Firebase*

- E-commerce app made to resemble an online clothing store
- Payments handled with Stripe integration
- Responsive on mobile and various screen sizes

## Experience

### JPMorgan Chase & Co. – Software Engineer Intern

December 2020 – March 2021

- Collaborating in team as part of the Scrum/Agile process by using JIRA/Confluence to document bugs and generate user stories in order to guide engineering team efforts and find solutions
- Rewrote logic for server-side code, in relation to how the API manages traffic by utilizing a Python script, in order to generate logs detailing IP addresses, and ID #'s, resulting in a collection of any unauthorized requests/access attempts

### Seattle Central College – Software Development & Testing

March 2020 – March 2021

- Certificate in Software Development & Testing
- 2x Dean's List and President's List
- 4.0 GPA

## SKILLS

HTML5  
CSS3/SASS  
Bootstrap  
JavaScript/ES6  
React + Redux  
Node.js + Express  
MongoDB  
PostgreSQL  
C#  
Unity
