SKILLS

PROGRAMMING

HTML, CSS, Bootstrap, Sass, JavaScript, React, Jest, Node.js, Express, MongoDB

SOFTWARE

Visual Studio Code, GitHub

METHODOLOGIES

BEM, REST, CRUD

PERSONAL WEBSITE

ACTIVEARSAL.GITHUB.IO

WEB APPLICATION DEVELOPER

SMARTBRAIN APP

A face recognition app that allows users to submit pictures and see how they interact with Clarifai's face recognition API. Features a front end (React.js), a back end (RESTful API server with Express) deployed to Heroku storing usernames and hashed passwords securely with PostgreSQL.

YELPCAMP

Full-Stack application that allows users to view a list of all Campgrounds on the database (MongoDB), as well as register/login and create their own Campgrounds. Implementing strict User Authorization, users must be signed in to edit/remove content they own, but are free to view content created by other users at any time.

RESTFUL BLOG

Blog app where users are able to Create, Read, Update, and Delete blogs from within the database. Features a clean and responsive Front End with Semantic UI, a RESTful server with Node.js and Express.js, and a database to store blogs using MongoDB.

ABOUT

   As a self-taught developer it is true that I don't have a traditional background. However, it is also true that I strive to improve every day, am passionate in keeping up with the latest technologies, and always aim to write clean and efficient code. Aside from learning and staying engaged with various web development communities, my hobbies include kickboxing, drawing, cooking, and playing video games.
