Arsal Mehran

Software Engineer   **(253)-508-6765 | arsalmehran@gmail.com**

Self-taught developer strong in JavaScript and open to exploring any technology that excites me, though currently focusing primarily on the MERN stack (MongoDB, Express.js, React, Node.js). Passionate about creating projects with responsive, cutting edge designs and an emphasis on optimizing performance.

PROJECTS

Face-Recognition app — *React.js/Express*
- Submit pictures for detection with Clarifai's Face-Detection API
- User submissions are tracked and scored with each submission

YelpCamp — *Node.js/Express/MongoDB*
- Users can view all campgrounds created by other users
- Users who register/sign-in can create new campgrounds and write comments
- Users can edit any campgrounds or comments they've created created

Clothing Store — *React/Redux/Firebase*
- E-commerce app made to resemble an online clothing store
- Payments handled with Stripe integration
